

Standardized Billing Template

Research Informatics service fees for funded research studies at Children's Healthcare of Atlanta

Note: For unfunded or exploratory research requests, please submit a data request [here](#) for an initial data needs consultation. **Must be on the Children's network to access the link.

	REDCap Services	Children's Resources	Description
<input type="checkbox"/>	Basic REDCap Service	\$800 (initiation fee)	REDCap Maintenance and Support: (includes storage, software upgrades, new module, installation, environment testing) training as needed; Consulting, Meetings, & Development (up to 5hrs).
<input type="checkbox"/>	Meetings & Development	\$60 per hour (after 5 hours)	Additional development completed by REDCap team
<input type="checkbox"/>	Complex REDCap	\$85 per hour (after 5 hours)	Development: e-Consent builds, 21 CFR Part 11, FHIR Integration
	Research Business Partnering		
<input type="checkbox"/>	Consulting	\$75 per hour	Discovery meeting with application analysts to review project needs and assess services needed
<input type="checkbox"/>	Order Sets	\$65 per hour	Industry-Funded Only: Order Sets are preconfigured groups of orders (e.g., study drugs, labs, or any testing that might be performed for the study) in Epic that correspond to the study requirements, to ensure that all required testing is completed.
<input type="checkbox"/>	Best Practice Advisories (BPAs)	\$70 per hour	Industry-Funded Only: Most flexible, widely applicable decision support tool in Epic. BPAs can: prompt users to take follow-up actions (e.g., place suggested orders, add diagnoses or allergies to the chart, etc.), trigger task templates, send In-Basket messages, appear passively in clinical navigators
	Health Informatics Core		
<input type="checkbox"/>	Consulting	\$75 per hour	Discovery meeting with MD Informaticists, developers, analysts, engineers, etc. to review project needs and assess services needed
<input type="checkbox"/>	Data Extraction	\$100 per hour	Data extraction of discrete elements from the EHR and, in some cases, other CHOA clinical databases
<input type="checkbox"/>	Complex Data Extraction	\$110 per hour	Same as above >40 hours
<input type="checkbox"/>	Reporting	\$90 per hour	Development of reporting portal products for prospective study enrollment or recurrent prospective data access.
<input type="checkbox"/>	EPIC Builds/Reporting Workbench	\$75 per hour	Development of new Epic tooling, including documentation templates, notifications, MyChart build. EHR-embedded, real-time reports, primarily used for prospective study enrollment.
<input type="checkbox"/>	Human Centered Design	\$80 per hour	User research, task analysis, design and evaluation of user interfaces
<input type="checkbox"/>	Software Engineering	\$85 per hour	Development of new user-facing software applications
<input type="checkbox"/>	Data Engineering	\$90 per hour	Designing and building automated systems for data collection, storage, and submission. Examples: Data warehousing, automated data updates, multi-center registry updates
<input type="checkbox"/>	Risk Assessments	\$90 per hour	https://choa.careforceconnection.org/docs/DOC-37465
